

Ther-Biotic® Infant Formula

A multispecies probiotic formula to meet the special needs of infants.

This high-potency, hypoallergenic blend of 5 Bifidobacterium and 5 Lactobacillus species is designed to safely meet the metabolic and intestinal support needs of infants up to the age of 2 years. All species in Ther-Biotic® Infant Formula produce predominantly L(+)-lactic acid that can be safely metabolized by infants. Ther-Biotic® Infant Formula is designed to support a normal infant microbiota that can be easily disrupted by cesarean section delivery, formula feedings, antibiotics, toxin exposures, and a maternal diet lacking in fresh fruits and vegetables.

SUPPORTS NORMAL MATURATION OF AN INFANT'S GI AND IMMUNE SYSTEM.

Microbial colonization of the gastrointestinal tract, vital for normal gastrointestinal and immune system development, begins at birth. An infant's microbiota can be disrupted by cesarean section, hospitalization, formula feeding, and antibiotic use. Disruption may impair immune function and allow the proliferation of microbial pathogens, leading to allergies and infections in infancy and predisposing to long-term health problems such as asthma. Ther-Biotic® Infant Formula offers select probiotics to restore neonatal microbiota balance and support healthy GI and immune system maturation.

PROTECTS AGAINST INTESTINAL PATHOGENS.

Ther-Biotic® Infant Formula probiotic species reduce intestinal numbers of pathogens such as *Escherichia coli*, *Clostridium perfringens*, and *C. difficile*. These probiotics inhibit translocation of *E. coli* and *Bacteroides* species from the intestines to other organs, inhibit rotavirus shedding, and reduce the risk of rotavirus diarrhea.

REGULATES IMMUNE RESPONSE TO ANTIGENS.

Ther-Biotic® Infant Formula supplies essential *Lactobacillus* species such as *L. casei*, critical for immune dendritic cell differentiation, and *L. rhamnosus*, shown to reduce the risk of allergies and atopic eczema. The *bifidobacterium* species provided are normally predominant in the neonatal microbiota and suppress total and allergen-specific IgE secretion, modulate immune response to gastrointestinal and respiratory allergens, and inhibit neutrophil elastase regulating innate immune function.

SAFE FOR AN INFANT'S METABOLISM.

An infant's gastrointestinal tract is not fully mature and cannot metabolize the D(-) isomer of lactic acid produced by certain *Lactobacillus* species often found in adult probiotics, such as *L. acidophilus* and *L. reuteri*. Ther-Biotic® Infant Formula contains *Lactobacillus* species that predominantly produce the L(+) isomer of lactic acid, the safe form for an infant's metabolism, eliminating the potential risk of D(-)-lactic acidosis.

- Formulated for infants up to 2 years
- Free of D(-)-lactic acid-producing species
- Hypoallergenic, dairy- and gluten-free
- Easy to administer powder formula

KLAIRE LABS®

A ProThera®, Inc. brand

Ther-Biotic® Infant Formula

A multispecies probiotic formula to meet the special needs of infants.

INDICATIONS

Ther-Biotic® Infant Formula is intended for daily use to provide a broad spectrum of beneficial *Bifidobacterium* and *Lactobacillus* probiotic species for maintenance of GI and immune function in infants up to the age of 2 years.

FORMULA

Supplement Facts

Serving Size 1/4 Teaspoon (1 gram) • Servings Per Container 60

Amount Per 1/4 Teaspoon

Probiotic Blend (10+ billion CFUs) in a base of inulin (derived from chicory root)	1 g*
Lactobacillus species	5+ billion CFUs*
<i>Lactobacillus rhamnosus</i>	
<i>Lactobacillus casei</i>	
<i>Lactobacillus paracasei</i>	
<i>Lactobacillus gasseri</i>	
<i>Lactobacillus salivarius</i>	
Bifidobacterium species	5+ billion CFUs*
<i>Bifidobacterium infantis</i>	
<i>Bifidobacterium bifidum</i>	
<i>Bifidobacterium longum</i>	
<i>Bifidobacterium breve</i>	
<i>Bifidobacterium lactis</i>	

*Daily Value not established.

Other ingredients: None.

K-TIF 2.1 oz (60 grams)

SUGGESTED USE

1/4 teaspoon (approximately 1 gram) daily mixed with expressed breast milk, formula, or solid food at room temperature.

PRODUCT SUPPLY

2.1 ounces (60 grams) per bottle.
